Research				
Sound Generation Method based on Timing-aligned	Visual Feature Mapping			
2021.09-2022.03 ChinaMM 2022				
• Generating high-quality sound matching to silent	videos in content and timin	g alignment, through		
extracting the visual features and building a visual fe	eature-guided model;			
• Proposed a timing-aligned visual feature mapping	<u> </u>	al feature aggregation		

module, cross-modal feature mapping module and audio decoding module;
• Experimental results show that the new method has a significant improvement in fidelity and timing-

alignment, compared with the state-of-the-art method.

Multi-Scale Gragh Convolutional Interaction Network for Salient Object Detection

2020.09-2021.03 ICIP 2021

• Salient object detection (SOD) aims to distinguish the most visually obvious regions;

- Proposed the multi-scale graph convolutional interaction network (MGCINet), which consists of the feature interaction module (FIM), the feature aggregation module (FAM), and the residual refinement module (RRM).
- Experiments show that our method outperforms the state-of-the-arts on five benchmark datasets under different evaluation metrics.

Theses and Projects

2022	Sound Generation	Method based on	Timing-aligned	Visual Feature	Mapping (ChinaMM)

- 2021 Multi-Scale Gragh Convolutional Interaction Network for Salient Object Detection (ICIP)
- 2019 Application Design and Development of Video Stabilization based on Image Processing
- 2018 Massive and Highly Concurrent Library Management System Design and Development based on Open Source Relational Database
- 2017 Visual Effect Design and Program Development of 3D Game based on Jmonkey Engine

Awards

Second Class Prize	National Post-Graduate Mathematical Contest in Modeling
First Class Scholarship (5%)	Shanghai University
First Class Scholarship (5%)	Shanghai University
Second Class Scholarship (10%)	Yunnan University
Outstanding Student Leaders (5%)	Yunnan University
Second Class Scholarship (10%)	Yunnan University
Outstanding Student Leaders (5%)	Yunnan University
	First Class Scholarship (5%) First Class Scholarship (5%) Second Class Scholarship (10%) Outstanding Student Leaders (5%) Second Class Scholarship (10%)

Social Practice

2021	Caption Operator in 24t	h Shanghai International Film Festival
2021	Caption Operator in 2-to	ii Shanghai international i inn i estivai

- 2018 Director of News Center of the Student Union of the School of Software, YNU
- 2017 **Director** of Journalist Department of the Student Union of the School of Software, YNU
- 2016 Volunteer Teacher in Qianwei Town Central School, Yuxi City, Yunnan Province

Skills

Coding: Python (Proficient); C. Java (Familiar); Pytorch (Proficient)

Interests: Multi-Media & Digital Media Processing; Multimodal learning, Cross-modal Generation

English: CET-6, Language Service Competence Accumulation & Training(S100 Certification)

Software: Adobe Photoshop, Premiere, Audition, Maya, 3Ds Max, Unity
